How To: Build Your Own AR-15/AR-10

The AR-15/AR-10-platform firearms are skyrocketing in popularity. Because of the way they are designed and manufactured, you can assemble your own AR-15 with common hand tools, in just a few hours, and, - if your spouse permits it - right on your kitchen table. Join us to begin your build!

There will be three meetings, a short **Planning Session** to make sure we're all on the same page, and the actual **Lower Build Session** at which you'll assemble your lower half. This will be followed by an **Upper Build Session**, where you'll barrel your upper receiver and complete the rifle.

At the **Planning Session**, we'll go over a check-list of all the parts you'll need to assemble a lower half and how to acquire the parts in time for the Lower Build Session. We'll discuss the various choices available for stocks and triggers, and which tools you'll need. You'll have the option of getting all of your parts yourself, or of ordering a kit which includes everything you'll need except for the lower receiver itself (the lower receiver is the serialized "firearm", and must be purchased through a licensed dealer).

At the **Lower Build Session**, experienced builders will be on hand to guide you through the build process. We will have tools and a few parts (pesky detent pins!) available for you to use. At the end of the session you will have a complete AR-15 lower assembly. You can drop a complete upper onto it, or join us for Part 3 (Upper Build) in March!

**Planning Session:
Friday, January 20, 6-8PM**

**Lower Build Session:
Saturday, February 18, 9AM -Noon**

Upper Build Session (TBD):

**All Meetings at Monmouth Fish & Game
There is no charge for this class!**
